Full Performance in the Lab

AT A TOP PRICE

The CORiTEC 250i PRO+ is a new machine series that impresses with its ideal balance of performance, versatility and space requirements. The optimally matched axis drives operate with low vibration and thus ensure impressive production results. The solid basic construction of a mono-block cast body ensures smooth running.

Perfect for laboratories that want to produce complex indications efficiently and precisely. The CORiTEC 250i PRO+ series is very well suited for processing metal blanks. Other common dental materials can also be professionally processed wet and dry.

The CORiTEC 250i PRO+ series, available as 250i PRO+ and 250i Loader PRO+, offers flexible solutions that are tailored to the needs of modern dental laboratories.

Indications		
All common indications	  	  

ALL ADVANTAGES AT A GLANCE

PARTICULARLY QUIET RUNNING THANKS TO 1KW HIGH-FREQUENCY SPINDLE

The air-cooled spindle ensures a long service life for the milling tools and at the same time offers outstanding performance for efficient work.

- ✓ Powerful 1.0 kW spindle with 60.000 rpm
- ✓ Tools with 6 mm shaft diameter
- ✓ Maximum durability

BLANK / ADAPTER CHANGE WITHOUT LOSS OF POSITION

The zero-point clamping system module enables the blank and adapter to be changed quickly and precisely with just one click. This system significantly increases efficiency and precision while optimizing changeover processes, especially when machining on different material holders.

- ✓ Precise changing without loss of position
- ✓ Compatible with a wide range of adapters
- ✓ Maximum flexibility for different applications

TOOL MAGAZINE CHANGE IN SECONDS

The tool magazine holds 10 tools and can be completely exchanged with a single movement, e.g. for other material groups.

- ✓ 10-fold tool changer
- ✓ Quick exchange of the complete magazine
- ✓ Simple loading

SMART AND INTUITIVE OPERATION

The machines in the CORITEC 250i Pro+ series are easy to operate thanks to the smart touch screen and intuitive user interface. After a short briefing, the system can be operated without time-consuming training. Intelligent assistants for e.g. cleaning and autocalibration supports the user in daily operation.

Thanks to the connection to the DentalSmartMarket (DSM) and regular automatic updates, you are always up to date.

24/7 Automation for Your Laboratory

CORiTEC® 250i LOADER PRO+
WITH 6-FOLD BLANK CHANGER
VIA INDUSTRIAL ZERO-POINT
CLAMPING SYSTEM

The model is optionally available with a practical loader option, which enables up to 6 blanks to be changed automatically. This ensures unattended 24/7 production, reduces downtime and increases profitability through continuous, efficient operation – perfect for laboratories striving for maximum productivity.

Maximum Performance: Wet & Dry

FOR EVERY MATERIAL REQUIREMENT

✓ Wet machining with integrated filter / cooling lubrication system ensures precise results with outstanding surface quality – ideal for glass ceramics, composites and titanium.

✓ With dry processing, you can achieve fast and precise results, e.g. with zirconium, PMMA and everyday CoCr indications. The system shows its strengths through its enormous flexibility in the range of applications, with high-quality surfaces and high accuracy.

Perfect Dimensions

SOPHISTICATED, EFFICIENT DESIGN FOR MAXIMUM STABILITY

The CORITEC 250i PRO+ series impresses with its compact design and intelligent construction, which minimizes space requirements while enabling maximum efficiency. With state-of-the-art technology and robust construction, it guarantees optimum performance and precise results, even in demanding applications. An ideal solution for laboratories that value stability and flexible application options.

FEATURES

APPLICATIONS

CONTROL SOFTWARE

CAM SOFTWARE

ACCESSORIES

Maximum Flexibility

HOLDER AND ADAPTER

Our zero point clamping system ensures that the holders can be changed quickly and that the blanks are always precisely positioned and kept stable - for precise and reliable results with every milling process.

The changing system works quickly and safely: it is opened with air pressure and automatically locked by a spring. A special pin and a conical guide also ensure that each workpiece is seated with micrometer precision. This means that the workpiece remains firm and stable at all times! This system makes milling easier, faster and better – and takes you one step further with every project!

1 6-FOLD ADAPTER

With the 6-fold adapter, up to six blocks or abutments can be processed simultaneously. Flexible, interchangeable strips facilitate adaptation to different adapter systems and enable quick material changes for maximum efficiency.

2 BLANK HOLDER

The closed stainless steel blank holder offers high stability and is ideal for the precise processing of all common materials in blank form.

3 C-CLAMP HOLDER

The half-open blank holder enables 5-axis machining up to 90° and opens up new possibilities for complex geometries and precise post-processing. Its design guarantees exact positioning for the best results.

4 UNIVERSAL HOLDER

The universal adapter is a versatile single holder for turning, milling and grinding operations. It offers high accuracy of fit and enables tool-friendly processing. With a wide selection of adapters, it is ideal for glass ceramic blocks and various abutment systems.

Versatile Possibilities

INDICATIONS AND APPLICATIONS

METAL PROCESSING

The machine guarantees high stability when processing crowns, bridges and bar requirements in CoCr and titanium. As a result, virtually all indications can be produced in the laboratory with good quality and accuracy of fit. The perfect price/performance ratio of the CORiTEC 250i PRO+ series provides the user with a perfect solution for demanding dental indications.

- ✓ High strength & stability
- ✓ Processing of CoCr and titanium blanks
- ✓ Perfect surface quality and precision

MILLING OF FULL DENTURES

The milling process for full dentures combines time and cost cost efficiency with maximum precision. It guarantees exact results through perfect accuracy of fit and offers flexible design options for base and occlusal surfaces – ideal for Individual and highly esthetic prostheses.

CORiTEC® preMill ABUTMENTS

The CORiTEC preMills are supplied with abutment screw and compatible libraries, modules and holders. They enable dental technicians and dentists to produce validated and efficient customized one-piece titanium abutments – with full control over quality and time, in compliance with FDA requirements.

- ✓ Short production times
- ✓ Validated overall system
- ✓ High accuracy of fit thanks to prefabricated implant interface

GRINDING OF CAD/CAM BLOCKS

The 6-fold and 3-fold adapter ensures the precise fabrication of various tooth restoration solutions. The flexibility of the various adapters enables efficient processing.

- ✓ Crowns and bridge frameworks
- ✓ Onlays, inlays and veneers

THERAPEUTIC SPLINTS

CORiTEC machines enable the precise manufacture of therapeutic splints. They guarantee a precise fit and comfort thanks to flexible production options and meet the highest demands in laboratories and practices.

- ✓ Bite splints, bleaching splints
- ✓ Mandibular advancement splints and aligners

CROWNS, BRIDGES AND MORE

From single crowns and bridges to implant work: With a wide range of materials, we guarantee the highest quality with short production times.

- ✓ Ceramics and hybrid materials
- ✓ Metals and alloys
- ✓ Polymers and plastics

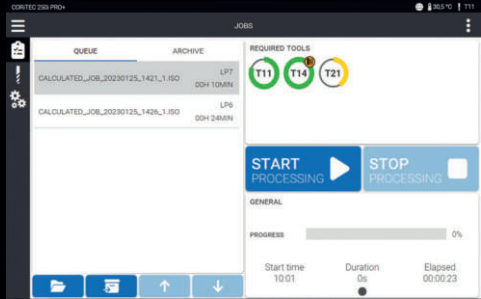

Easy-To-Use

INTUITIVELY OPERABLE USER SOFTWARE

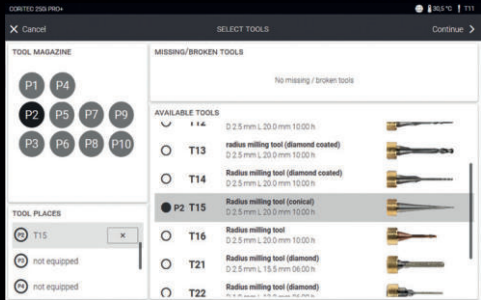

The SmartControl software enables intuitive operation of our milling machines – from job selection to monitoring the machine status. With a self-explanatory user interface in several languages, getting started is particularly easy. Just two clicks are all it takes to start a milling process. Benefit from software-supported efficiency that saves time and optimizes your workflow.

CORiTEC® SmartControl

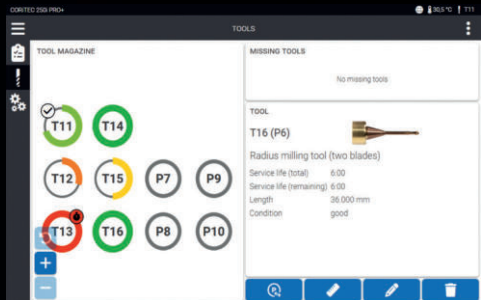

- ✓ Modern, intuitive design with touch operation and image-based instructions
- ✓ Intelligent selection of milling jobs
- ✓ Simple tool and material loading
- ✓ Auto-calibration of the machine
- ✓ Assistant-guided cleaning and maintenance
- ✓ Connection to the Dental Smart Market (DSM) platform
- ✓ Multilingual user interface
- ✓ Automatic updates for maximum safety
- ✓ Remote monitoring via integrated online camera
- ✓ Support via remote control

Automated transfer of information from the CAM software

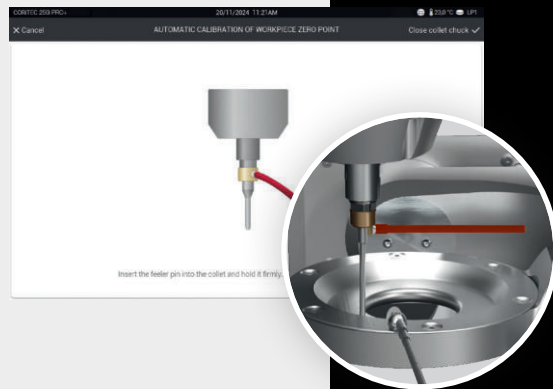

Optimum management of tools

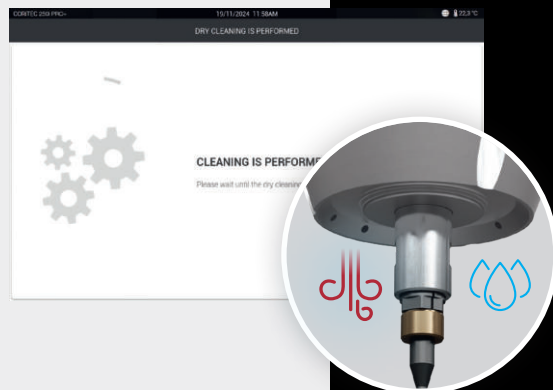

Optimized for touchscreen operation

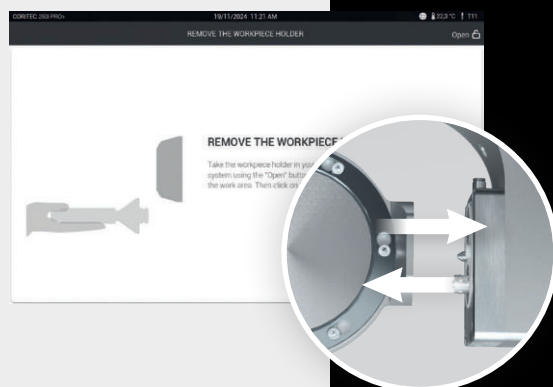

AUTOCALIBRATION

Autocalibration enables quick and convenient handling to ensure consistently precise results. With intuitive step-by-step instructions and direct integration into the machine control system, the calibration process is simple and efficient. This saves you time and resources, while you can count on reliable and consistent precision.

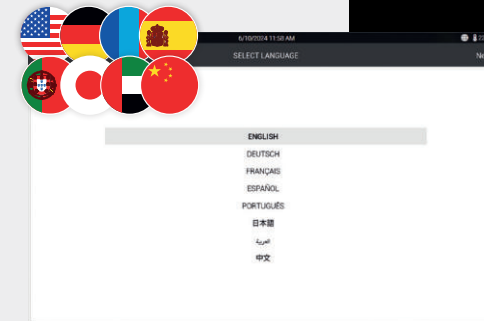

ASSISTANT-GUIDED CLEANING

The assistant-guided cleaning process makes wet and dry cleaning your machine simple and efficient. The integrated step-by-step instructions ensure that the cleaning process is completed quickly and reliably – without time-consuming preparation or complex instructions. This function not only helps to extend the service life of the machine, but also ensures consistently high performance.

SIMPLE HOLDER CHANGE

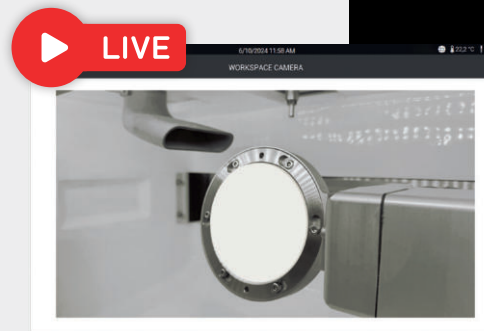

With the zero point clamping system, changing the holder is precise and uncomplicated. The control software guides users through the process with intuitive step-by-step instructions. As a result, the holder is positioned quickly and accurately, ensuring smooth operation and consistently precise results. At the same time, the workflow is optimized and the time required is significantly reduced.

INDIVIDUAL LANGUAGE SELECTION

The flexible language options of the program interface support the operation in the preferred language. This versatility ensures intuitive use and maximum efficiency in day-to-day work worldwide.

- ✓ German
- ✓ English
- ✓ Chinese
- ✓ Spanish
- ✓ French
- ✓ Portuguese
- ✓ Japanese
- ✓ Arabic

MILLING PROCESS MONITORING

The integrated HD camera enables direct monitoring of the milling process in real time. If questions or challenges arise, the support team can respond quickly to ensure efficient support.

DSM CONNECTION

The DSM connection enables live monitoring of your machine systems and targeted optimization of your workflow.

- ✓ Automatic updates & 24/7 access
- ✓ View machine status live
- ✓ Maintenance reminder
- ✓ Warranty protection
- ✓ Machine park overview

Smart High-End Solution

PERFECTLY INTEGRATED CAM SOFTWARE
FOR ALL CORiTEC MACHINES, MATERIALS
AND INDICATIONS

CORiTEC® iCAMHD

The CORiTEC iCAMHD software combines a high level of automation with efficient order management. Thanks to the intuitive workflow, familiarization is quick and easy, while processing options can be managed individually. Automatic updates keep the software up to date at all times. Validated strategies ensure precise results and excellent surface quality, while integrated collision monitoring guarantees maximum safety in process control.

iCAM HD advantages at a glance:

- ✓ hyperDENT based CAM software
- ✓ CAM templates for fast and precise results
- ✓ High level of automation for more efficient production
- ✓ Intuitive workflow that enables fast familiarization
- ✓ Automatic updates that always keep the software up to date
- ✓ Tool path strategies for perfect surface quality
- ✓ Collision monitoring for maximum safety and reliability

6-fold holder for ceramic blocks

Various applications in the C-Clamp holder

Flexible and Smart

PERFECTLY INTEGRATED CAM SOFTWARE
FOR ALL CORiTEC MACHINES, MATERIALS
AND INDICATIONS

CORiTEC® iCAM V5 smart

The CORiTEC iCAM V5 stands for exceptional surface quality and maximum accuracy of fit – ideal for all common dental materials. Optimized tool strategies reduce machining time, extend tool life and ensure particularly smooth machine operation. This ensures precise results in 5-axis machining and maximum efficiency of your CAD/CAM system.

Advantages at a glance:

- ✓ **5-axis simultaneous processing:** Precision even with undercuts
- ✓ **No enforced annual fees:** Maximum cost efficiency
- ✓ **Wizard workflow:** Fully automatic, intuitive operation
- ✓ **ReFit function:** Flexible exchange of abutment geometries
- ✓ **Retaining bars:** Securely positioned for optimum results

6-fold holder for ceramic blocks

Various applications in the C-Clamp holder

Coordinated, Validated Workflow of the Overall System

SEAMLESSLY INTERLOCKING PROCESSES

The combination of iCAM software, high-quality milling machines and specially developed CORiTEC tools provides you with a validated complete system with full service and support from a single source. imes-core represents first-class production solutions that seamlessly combine software, precise milling and grinding tools and high-performance machine technology.

Perfect Synergy

Between Machine, Milling Tools, iCAM and Materials

CORiTEC® temp PMMA disc

CORiTEC temp PMMA disc is suitable for the fabrication of:

- ✓ Long-term temporary crown and bridge restorations (up to 3 years) in the anterior and posterior region with up to 2 pontics
- ✓ Splints for therapeutic restorations for temporomandibular joint problems and functional diagnostics
- ✓ Denture bases
- ✓ Temporary anterior veneers for esthetic shape corrections

LONG RADIUS CUTTER

Cutters and Grinders

CORiTEC® TOOLS

CORiTEC milling tools guarantee precision and efficiency. Perfectly matched to our machines, they offer maximum performance, durability and optimum results – combined with the right materials for your applications.

- ✓ High-speed milling tools
- ✓ Torus milling tools
- ✓ Shaft tools
- ✓ Drilling tools
- ✓ Thread milling tools
- ✓ Aligner milling tools
- ✓ T-milling tools
- ✓ Standard milling tools

Sintering Furnaces

SINTERING PROCESS FOR ZIRCONIA

iSINT eco

The iSINT eco combines high-quality technology with a space-saving design and a fair price. With a sintering dish of Ø 100 mm, it offers capacity for up to 25 units. The door hinge can be flexibly mounted on the right or left – ideal for a versatile laboratory environment.

iSINT PRO

The iSINT PRO enables the sintering of up to 80 individual crowns. With four MoSi2 heating elements, it offers both long-term sintering and SPEED sintering at up to 120°C/minute. A 4-line LCD display simplifies program control. Additional functions such as timer and service programs as well as a pre-drying program make the iSINT PRO a flexible solution for modern laboratories.

Machine Tables

SOPHISTICATED FUNCTIONALITY

Our machine tables have been specially developed for different machine types and offer a combination of stability, functionality and modern design – for maximum efficiency and an attractive appearance.

The machine tables offer storage space, stable castors, integrated drawers and an area for extraction systems – ideal for daily use.

- ✓ Highest quality – Made in Germany
- ✓ High level of comfort and ergonomics
- ✓ Stability for dynamic processes
- ✓ Modern design
- ✓ Push-to-open function
